FRANK F. WEDEKIND---APPLIANCES

(SEE PAGE X)

PANOPEPTON

designed for the feeding of the sick, is manufactured and standardized in accordance with practical scientific requirements—to meet the need of a ready-made peptonized food containing in proper proportions all the essential elements of nutrition.

Panopepton was submitted to the physician as a food for the sick, ready to use, derived from beef and wheat, containing in a stable sterile solution the *entire digestible substance* of these foods in a non-coagulable, highly diffusible form, with a well-considered and carefully adjusted ratio of protein to carbohydrate—a standardized food developed with scientific accuracy in every detail.

Panopepton has been subjected to thorough scientific inquiry, technical discussion and physiological test, and is now everywhere recognized as a valuable and important contribution to the resources of alimentotherapy.

DR. R. E. BERBERT'S
MUM

Think of Cutter's

When you have occasion to think of Antitoxin, think of Cutter's. It positively represents the last word in Antitoxin production. We have put the best that's in us into this product.

FOR SEVEN YEARS

we have striven to improve it. For seven years we have produced only biologics. Our ambition has been to excel in this one line and we candidly believe we have achieved it. But we want you to believe it. We want you to

PUT YOUR FAITH IN US

We know you will have no reason for a reaction. If you prefer the Concentrated Antitoxin.

A. BERBERT & BRO.

Cutter's Antitoxin, GLOBULIN, is concentrated with due regard for the specific gravity of the blood and is of the smallest volume consistent with this idea. Over-concentration is a serious mistake. It implies slow absorption, and loss of time implies loss of efficiency.

Please specify "CUTTER'S", and encourage by your support a worthy California enterprise.

The Cutter Laboratory
 Berkeley, Cal.

U. S. Government License No. 8

A. M. A. Principles of Ethics.

"It is equally derogatory to professional character for physicians to dispense or promote the use of secret remedies."

The Extremes We Employ to Secure Utter Asepsis

The B & B surgical laboratory is the very epitome of modern efficiency.

The Aseptic Room, where the products are sterilized, is in an aseptic building—built of steel, cement and tile. A thousand surgeons helped to perfect the plans.

The room is lined in white enamel, without closet or shelf, without crack or seam. Even the corners are rounded.

The tables are made of enameled steel.

The people who work there are governed by surgical rules. Every condition is constantly guarded.

Here B & B surgical dressings come to be sterilized. Here they are packed in sterilized jars and containers.

We have spent two decades in perfecting these products. The highest skill that we know is employed on them.

B & B Handy Package Absorbent Cotton

B & B Handy Package Absorbent Cotton is sterilized—absolutely—and is kept aseptic by a germ proof wrapper. Its unusual absorbency, long fibre and general superiority, are subject to proof: examine and test it yourself.

Each formula and process is the result of countless experiments. Each has stood the test of years.

No man knows how to make surgical dressings better than the B & B. When you specify them you invariably get the utmost you expect.

Samples gladly sent on request.

Bauer & Black

Chicago and New York

Makers of Surgical Dressings, Absorbent Cotton, Adhesive Plaster, O-P-C suspensories, etc.

A. M. A. Principles of Ethics.

"It is equally derogatory to professional character for physicians to dispense or promote the use of secret remedies."

Mulford's Antitoxin and the New Syringe

Advantages of New Syringe: ASEPSIS, contamination impossible.

Positive Working: The metal plunger screws into the rubber plug, adjusting pressure and making action positive.

Metal finger-rest with rubber guard at top of syringe prevents any possibility of syringe breaking or injuring operator's hand.

Needle attached with flexible rubber joint permits motion of patient without danger of tearing the skin—a great advantage in administering to children.

Our new adjustable rubber packing possesses great advantages; it is readily sterilized, does not harden, shred, absorb serum or become pulpy.

Simplicity and accuracy—no parts to get out of order.

Mulford's Antitoxin is Accepted Everywhere as THE STANDARD

The higher potency enables us to use much smaller syringes.
Minimum bulk—maximum therapeutic results

ANHEUSER-BUSCH'S
Malt-Nutrine
 TRADE MARK.

The Food Tonic

is the recognized standard of medicinal malt preparations of its class. It represents the proper balancing of specially selected ingredients, plus a perfected technique which is the result of years of experimentation by our chemists.

Only the choicest barley-malt and Saazer hops are used in the manufacture of **MALT NUTRINE** and the finished product contains all of the soluble substances of these two materials.

Malt Nutrine is a medicinal malt preparation and has been extensively prescribed by physicians as a **Food Tonic** for **nursing mothers, protracted convalescence from acute diseases, insomnia,** and a wide range of other conditions indicating the use of an appetizing, nourishing and mildly stimulating liquid food. It is low in alcohol strength (less than 2%) but high in food value (14% of pure extract of malt).

**Pronounced by the U. S. Revenue Department a
 PURE MALT PRODUCT
 and not an Alcoholic Beverage**

Sold by all druggists

Anheuser-Busch

Saint Louis

OBSERVE

That the indications for GARDNER'S SYRUP
AMMONIUM HYPOPHOSPHITE

are

Laryngitis, Pharyngitis, Bronchitis and Minor Coughs.

That you will not have to prescribe opiates or anodynes
in order to obtain the desired action.

That it is an active stimulating expectorant.

NOTE

That it will not be dispensed unless you specify
"GARDNER".

REMEMBER

That it is made from chemically pure Ammonium
Hypophosphite, sixteen grains to the fluid ounce.

That it is palatable.

Samples and literature will be gladly sent you, upon
request.

Firm of R. W. GARDNER,
P. O. Box 1525,
New York City.

KRYPTOK LENSES

Combine New and Far View Without
Seams

Note the Difference

The illustration to the left shows the entire absence of seams or lines on Kryptok Lenses. To all appearances Kryptok double-vision lenses are like single-vision lenses, yet they have two distinct focal points, one for distance and one for reading.

Kryptok Lenses Improve One's Appearance—Over 200,000 People Are Now Wearing Them

The illustration to the right shows the prominent seams of old style or pasted double-vision lenses. Such glasses attract attention and suggest old age.

The Medicine is in the Bottle as Well as on the Label

We are constantly making improvements in manufacturing processes.

Pursuant to this policy we have recently made an exhaustive study of our line of **ELIXIRS**. Three years of patient labor were given to this investigation. We engaged for the purpose the best elixir expert in the United States.

We could not improve our elixirs in respect to therapeutic efficiency. We *could*, in many instances, improve them in respect to flavor, permanence and physical appearance. This we have done, and to-day we have a line of elixirs that we believe to be unequaled by any other in the world—a line that is supreme in medicinal effectiveness, palatability, clarity and keeping qualities.

And not a single improvement in our whole line of elixirs has been made at the expense of manufacturing integrity. There has been no juggling of formulas, no omission of troublesome ingredients, no sacrifice of therapeutic values. Our elixirs are absolutely true to name—the medicine is in the bottle as well as on the label!

JUST OUT—A NEW BOOK ON ELIXIRS. WRITE FOR IT.

DIAMOND ANTISEPTICS, LILLY

YOU CAN'T MISTAKE THEM IN THE DARK

¶ The tablets are diamond shape and marked "POISON;" the bottle is of peculiar design—safeguarding users against error.

¶ Mercury Bichloride is first among the powerful germicides. The safest and best way to use it is in the form of Diamond Antiseptics, Lilly, which combine rapid solubility and certainty of germicidal action with the greatest safety possible.

Back View of Bottle
Containing 25 Large Tablets

¶ The tablets are hand-molded and their loose texture, angular shape and large surface render them rapidly soluble.

¶ A small amount of citric acid is combined with the bichloride which prevents precipitation of insoluble mercury in neutral solutions, hard water or when in contact with albuminous liquids.

¶ Solutions of Diamond Antiseptics are permanent and act with certainty on all septic matter, even in blood, pus, serum, etc.

¶ While soft or distilled warm water is best for solutions, Diamond Antiseptics dissolve quickly in moderately hard water—an important advantage in emergencies.

¶ They are made in two sizes—LARGE and SMALL, containing 7.3 grs. and 1.82 grs. of Mercury Bichloride respectively, and three colors—White, Blue and Pink. The large tablets are supplied in bottles of 25, 100 and 1000, also in pounds. The small tablets are supplied in bottles of 100, 500 and 1000.

¶ By specifying Diamond Antiseptics, "Lilly," you will take every precaution possible against inefficiency and error. Send request for samples to Indianapolis.

MODIFIED MILK

If you modify milk for infant feeding, modify it completely, and get the full benefits of modification.

The best method of modification is with a properly prepared cereal decoction made from Eskay's Food. It stands in a class of its own.

ESKAY'S Albumenized FOOD

is both a modifier and an auxiliary food. It flakes the casein of cow's milk and makes the proteids of the milk as digestible as those of human milk; it emulsifies the fat and obviates fatty indigestion; it adds sugar of milk and brings up the caloric value of the diluted milk to normal; it makes cow's milk most digestible and does not derange digestion, and, what is most important, it promotes the growth and development of strong and healthy tissues.

Send for samples and pamphlet on Modified Milk.

HORLICK'S MALTED MILK

The Original and Genuine

IN CHRONIC DISEASES

The basis of a milk nutrient so delicious and digestible that it will prove a welcome relief to many of your patients from ordinary sick-room foods. Used with increasing confidence in the treatment of all acute and chronic diseases, because its nourishment is appropriated with the minimum danger of overtaxing digestion. The number of healthy, robust infants that are reared upon it every year attest its well balanced composition and uniform excellence.

That your patients may obtain the best as well as the original and genuine, always specify "Horlick's."

SUPRARENALIN

Its Superiority and the Reason

The vast superiority of Suprarenalin Solution places it in front, and this superiority is due to the fact that it is made from an absolutely ash-free crystalline active principle of the suprarenal substance. It is free from impurities, such as phosphates, etc. It is positively free from chemicals, like chloral and its derivatives. It is only a solution of Suprarenalin plus 7-10 of 1 per cent. chlorid of soda.

Suprarenalin Solution possesses the greatest keeping qualities of anything of the sort, American or European, natural or synthetic. Suprarenalin Solution is easily sterilized, as it may be boiled repeatedly.

SUPRARENALIN SOLUTION	1:1000
Suprarenalin Ointment	1:1000
Suprarenalin Inhalant	1:1000
Suprarenalin Triturates	1-70 of a grain

The pleasantest and most efficacious mode of administering **LITHIUM** is in the form of a Potable Water.

Dr. Enno Sander's GARROD SPA LITHIA WATER

contains more Lithium than any other water on the market and in the most desirable combination. It is manufactured from pure chemicals and pure distilled water, heavily charged with pure carbonic acid gas. Its formula (originally suggested to Dr. Enno Sander by Sir A. B. Garrod, M. D.) is as follows:

LITHIUM BICARBONATE.....	GRS. XIV
MAGNESIUM BICARBONATE.....	GRS. X
POTASSIUM BICARBONATE.....	GRS. XVI
SODIUM CHLORIDE.....	GRS. X
CARBONATED WATER.....	OZ. XVJ

No natural water can possibly dissolve as much Lithium as this, nor in such an effective medicinal state.

It Is Sold as Follows:

"Still" Garrod Spa, in Half-Gallon Bottles. Price 60 cents each or \$6.00 a case of one dozen bottles.

"Sparkling" Garrod Spa, in Pint Bottles. Price \$2.00 a dozen or \$7.00 a case of 50 bottles.

The "Sparkling" Garrod Spa is well charged with gas, and is a pleasant beverage, used by many as a table water. This is the kind most used.

The Place of Honor

A garment to which we accord the place of honor—next to our body—should, to say the least, be comfortable and cleanly.

Flannels, that is, all sorts of woolen underwear, are not only irritating, but no process of washing which they are able to stand is capable of freeing them from absorbed impurities.

The DR. DEIMEL LINEN-MESH UNDERGARMENTS can be washed by the use of soap and boiling water, without shrinking, felting or hardening. To the skin they are the most comfort-giving garment in existence.

Deimel Linen-Mesh Co., 176 Sutter St., San Francisco

Branches:

NEW YORK	WASHINGTON, D. C.	BROOKLYN	BALTIMORE	DETROIT
	MONTREAL, CAN.		LONDON, ENG.	

Dr. Deimel Linen-Mesh Supporters, Suspensories, etc., are made and sold exclusively by J. Ellwood Lee Co., Conshohocken, Pa.

No Uncertainty Now In Digitalis Medication;

Results to-day—at once, if need
be—not “to-morrow,” with
‘Digalen’ as your medium.

‘Digalen’ embraces all that excels in digitalis, all that exalts this drug above its rivals, all that makes it the remedy in heart affections for which there is no succedaneum.—“All the virtues of the drug in a nutshell, with the objectionable and toxic elements eliminated.” ‘Digalen’ acts with promptness and precision; will not provoke gastric irritation; is non-cumulative within the limits of the prescribed dosage. “The most delicate stomachs retain and absorb it readily,” declares a well-known physician.

‘Digalen’ is a sterile, stable solution of digitoxin amorphous Cloetta,—the one water-soluble digitoxin—and may be administered by mouth, enema, intravenous or intramuscular injection. Supplied in 1 Cc. ampullae (cartons of 6 and 12), and in 15 Cc. vials, each provided with a graduated pipette for measuring doses accurately. Dosage, 8-16 min.

Write to-day for a sample.

The Hoffmann-La Roche Chemical Works, 65 Fulton Street, New York.

Fine Opening

Here Is “Something” for Almost
“Nothing”

I am leaving my present locality where I have been in practice for nearly two years, and want some good man to occupy my office, which is in the very best office building in the city of 18,000 inhabitants. The rent is extremely cheap, and the waiting room is shared by one of the very best and most prosperous dentists of the place. If you will pay for this advertisement, and give satisfactory reference as to character, you can step into my boots. I have a few office goods which I would dispose of at less than cost, but you are under no obligation to take them. Such as the office carpet (one only), and some electric apparatus which I cannot use where I am going.

THE SUPREME TEST

When the good news came Tuesday morning, January 31, that our dear San Francisco would get the Fair, everybody wanted to telephone.

Upstairs in the MAIN CENTRAL OFFICE of the HOME TELEPHONE COMPANY, at 333 Grant Avenue, where the automatic switchboards are located, the connecting devices started in to hum and click.

As the volume of messages increased the automatic machines made a noise like ten thousand typewriters all going at once, for the whole city was telephoning—but the Homephone stood up under the load.

We met the extreme emergency, and the many thousands of Homephone patrons received instant information from their friends that San Francisco would surely get the Fair.

CONDUCTED BY SISTERS OF MERCY

The best equipped hospital in Northern California, numbering among its patrons the most eminent medical and surgical talent in the State.

The hospital has a large class of nurses in training; has Sisters in charge in each department, and a Resident Physician to watch over and superintend the care of the patients. During the past year a new wing, consisting of thirty-five rooms, has been added, and many improvements have been made, such as the establishing of a maternity ward at a flat rate of \$25 per week.

The Surgery, located in a separate building, has been entirely remodeled—tiles being substituted for concrete. Four new rooms have been built, and the completed structure now boasts of three commodious and independent operating rooms.

The course of lectures for the Training Class is given by the following doctors: Dr. W. A. Briggs, Dr. G. E. Simmons, Dr. J. H. Parkinson, Dr. Henderson, Dr. G. L. Stevenson, Dr. J. W. James, Dr. E. C. Turner, Dr. G. L. Simmons, Dr. T. J. Cox, Dr. G. W. Dufficy, Dr. Chas. McKee and the Resident Physician, Dr. F. E. Shaw.

Lane Hospital Announcement

Lane Hospital has recently been enlarged, renovated, and improved. A story has been added, increasing the capacity to one hundred and seventy-five beds. The operating rooms have been remodeled and a new top-lighted and thoroughly equipped laparotomy room added. The new arrangements increase the convenience and double the capacity of the surgical department, while the same high standard of efficiency in the operating room service will be maintained as in the past.

A Maternity Department has been established, consisting of a number of well-lighted, isolated rooms, in close relation to a completely equipped delivery room.

Two Children's Wards have been opened, and particular attention will be paid to the care and nursing of children.

The Eye and Ear Department has been provided with special wards, special nurses and separate treatment rooms.

The X-Ray Department is located in the new portion of the hospital and has been provided with every convenience for examination, treatment and laboratory work. An entirely new set of the latest and most efficient apparatus has been installed.

~~Roof Garden.~~ A special feature of the recent addition is a well-protected roof garden where convalescents may enjoy fresh air and sunlight and where patients may be given the benefit of outdoor treatment.

While the Faculty of Cooper Medical College acts as a medical and surgical staff to the hospital, the privileges of the institution are freely open to all regular physicians in good standing. Physicians having patients in Lane Hospital are assured of every professional courtesy.

Communications may be addressed to the resident physician.
